- ① **Awareness of a cloud based card management system**
- ② **The benefits of a contact free enrolment for staff**
- ③ **Comparing on-site enrolment vs contactless**

**Enrolment processes are changing. Access control and identification credentials have been evolving to provide easier and more user-friendly solutions life easier for staff and students alike.**

The number of people choosing new solutions has increased dramatically over the last 12 months, with educational organisations putting in place new procedures to ensure COVID-19 and social distancing guidelines are adhered to.

So, what's the best solution for creating credentials en masse for universities, colleges and other higher education establishments?

## The cloud-based card management system

The CardExchange Card Suite is a thorough solution that will streamline your work, save time and offer COVID-secure enrolment in 2021. It's the only cloud-based card management system you need.

Operating as a SaaS (software as a service) it meets the demanding requirements of higher educational establishments post-2020 thanks to a contact-free approach to enrolment, remote deployment GDPR and WCAG compliance.

Rather than a simple, time-consuming card printing set-up, CardExchange Cloud can be considered the ultimate card management solution thanks to its software-based infrastructure and Microsoft Azure hosting.

We'll go into the key benefits for staff and students later, but here's five quick fire points...

**Ideal For Contact Free Enrolment**

**Requires less staffing and resources**

**iOS and Android apps create a user-friendly experience**

**GDPR/WCAG compliant**

**Plans from £80 per month with monthly or annual billing options**

## **Manage data and credentials anywhere, anytime**

CardExchange Cloud allows you to manage all enrolment tasks remotely, from enrolment and photo capture through to card status management.

## **No long queues**

CardExchange Cloud apps allow you to receive data and photos remotely, eradicating the need for long queues during enrolment processes – great for operating in a COVID-secure way.

## **Less staff and system resources needed**

The centralized system means that you require less resources to manage the enrolment process, allowing staff time and attention to be dedicated elsewhere at busy periods.

## **Staff notifications**

Staff can be notified by email or SMS of any changes to the database or when they receive data and photos for approval

## **Integrates with Digital ID bureau**

Combining card production and enrolment has never been easier, with CardExchange Cloud integrating seamlessly with the Digital ID bureau ensuring card production and fulfilment can be sub-contracted easily.

## **Automatically updates connected systems with card status changes**

You can see updates and changes to cards and records in real-time as they are activated/deactivated/modified.

✔ **Data is safely and securely uploaded from the comfort of home**

ID Verification documents can now be securely uploaded from the comfort of home without emails or complicated platforms. Combined with remote image capture, this ensures an enrolment process free of touchpoints and stress.

✔ **Regular updates on their enrolment status via the app, SMS and email**

Updates on their enrolment status can be found via the app, SMS and email in real time.

✔ **A fully branded virtual ID card is available via the app**

A virtual ID card is available thanks to the app, showcasing their credential and creating a more attractive enrolment process.

✔ **New cards can be requested remotely**

Students have the ability to edit and update their credentials, as well as requesting a new card as and when required.

✔ **User-friendly apps**

CardExchange Cloud allows students to manage their card any time, anywhere, thanks to user-friendly iOS and Android applications on their smartphones.

**If you're wondering what exactly CardExchange Cloud adds to your enrolment process, here's a comparison to using a simple ID software**

## **Card Printing Software**

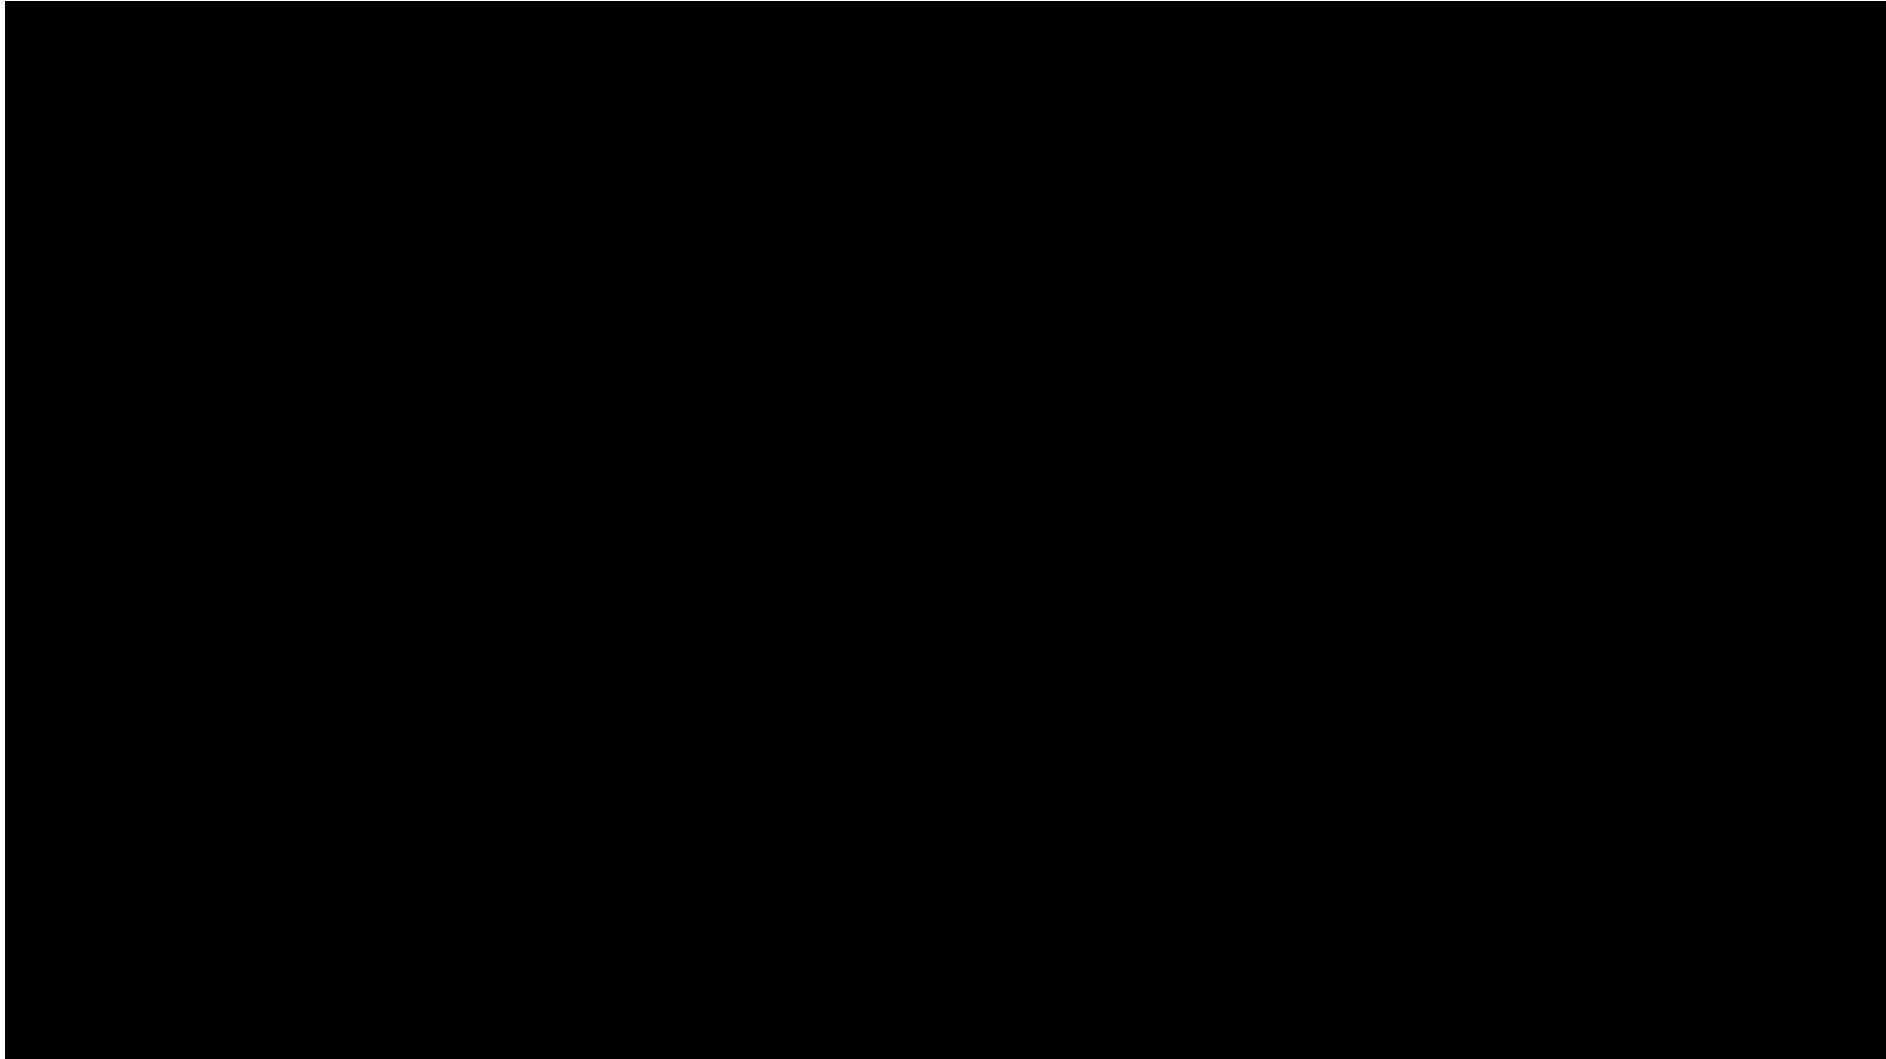

- Card Design
- Database Connection
- Photo Capture
- Signature Capture
- Card Printing
- Card Encoding

## **Card Management System**

- Manage Onboarding/Enrolment Process
- ID Verification
- Photo Approval
- Card Production/Issuance Approval
- Data Sync Business Rules
- Third Party System Integration
- Card Life Cycle Tracking
- Activity Logging
- History Reporting
- Card Holder & User Notifications
- Self-Service Card Management

## Any Questions?

---

Please post any questions you have in the chat area of this webinar.

All questions will be reviewed after the webinar by our sales and support teams and you will be emailed a full breakdown of all answers.
