Moving forward

## What is mobile access?

Mobile access refers to the process of using a smartphone, tablet or wearable device to unlock doors.

This solution is fast, flexible and more importantly it future-proof's your setting, as you'll never be without the ability to unlock a door.

## Fast Facts

Over 4,000 organisations have already implemented mobile access control worldwide

An additional 50% of companies are in the process of upgrading to mobile access or plan to make the move in the near future

That's a 19% increase in the past 2 years alone

Facts sourced by HID Global (Leading Mobile Access Provider)

## Fast Fact

17% of employees confessed to losing a physical access control card in the last 12 months.

## Why mobile access?

Many organisations are still reliant on issuing physical cards to unlock doors using unsecure technology.

It's common knowledge that these technologies can easily be cloned, alongside the high costs involved in card issuance.

Those responsible for access control can now improve security and streamline integration with new technology thanks to mobile access.

## Key benefits of mobile access

### Practical

Mobile access is easy as staff and visitors enter the building with their preferred device.

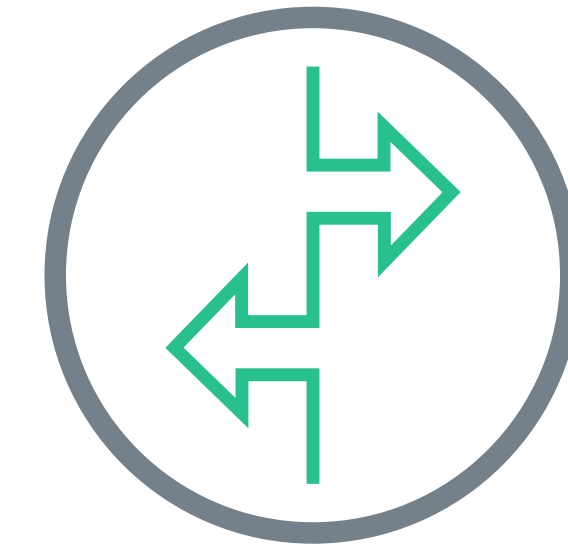

Administrators create, manage, issue and revoke licenses remotely in real-time via the cloud.

### Secure

Mobile access uses the highest level of encrypted security and privacy protection available.

Using a phone or device introduces numerous security benefits in comparison to cards or fobs.

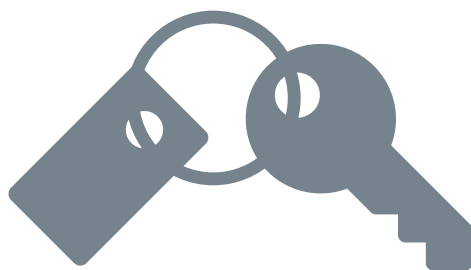

### Seamless

Removing all potential frustration points of traditional access control cards, the Integration of mobile access helps streamline operations and delivers a first-in class experience every time.

# Time and cost-saving

Time and money are critical business resources - and both are finite. Everyday security routines become more efficient when you switch to mobile keys.

Cost and time factors		Mechanical Keys	RFID credentials	Mobile Keys
Cost	Replace a lost key/credential	Medium	Low	None
	Replace a lock when a key/credential is lost	High	None	None
	Replace a master key	High	None	None
Time	Replace lost keys/credentials	High	Low / Medium	Low
	Update an access plan	High	Low / Medium	Low
	Physical hand-over meetings	High	High	None

## Device Compatibility

Modern smartphones, smartwatches and tablets are compatible, including:

Apple  
Android  
Huawei  
Google Pixel  
Samsung

Any device with the following operating systems

Android 4.4+  
iOS 11+

250+  
Devices

## Added Extras

Mobile access can help in a variety of other ways.

- ✓ **Attract top-tier talent**  
Offer the next level in security and experience with cutting-edge technology.
- ✓ **Reassuring people**  
Instant access and the ability to enter the building from the palm of their hands.
- ✓ **Streamline processes**  
Pre-issue access before arrival and deploy faster through the cloud.

# Old ways won't open new doors

The mobile revolution shows no sign of slowing down, and neither do we.

Integration is easy and with our help, stress-free.

We've helped numerous organisations make the move to mobile access and we'd love you to be next.

What you can  
expect from us

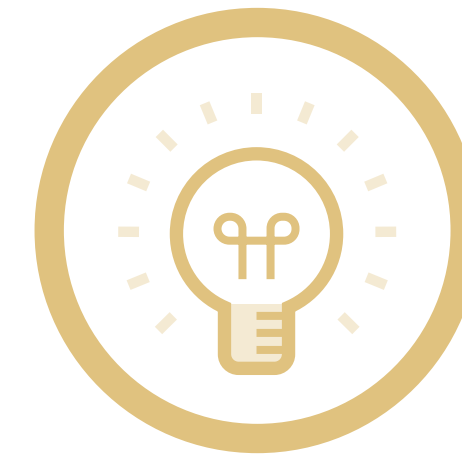

## SECURITY

We listen to your problems, identify your pain points and supply you with the products that will keep your buildings, staff, clients and visitors as safe as possible.

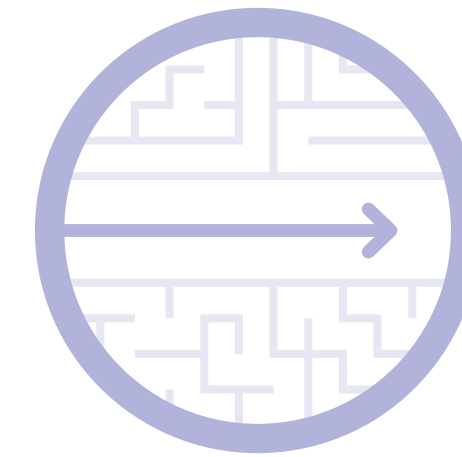

## SUSTAINABILITY

We believe in a sustainable future. Sourcing environmentally conscious products reduces single-use plastic, cuts CO2 emissions and helps businesses hit sustainability targets.

## INNOVATION

We never stop. As technology evolves, so do we. Direct partnerships with global manufacturers mean our customers benefit from the latest security technology.

## SIMPLICITY

We make things simple. Our products streamline processes, save time and make identification and access control hassle-free.
